Benefits obtained member in the presence of the food barn included in the high category, seen from the social benefits and economic benefits.

Keywords: Food barn, food security, economic benefit, social benefit

1. INTRODUCTION

Indonesia is an agricultural country known to have the potential of diverse natural resources. However, Indonesia is facing serious problems in terms of food shortages associated with poverty. One focus of development at this time directed at the handling of the problem of food insecurity and poverty by improving food security (Mulyono 2008).

According to Law No. 7 In 1996, food security is the fulfillment of the conditions of food for households which is reflected in the availability of adequate food, both in quantity and quality, safe, equitable and affordable. Food availability can be met from three sources: (1) the ability of domestic production; (2) food imports; and (3) management of food reserves (DKP 2006).

National food reserves consist of government food reserves managed by BULOG and community managed by the community. Traditionally people have built a system of food reserves village and household, one of them in the form of barns. Barns has been known as one of the food reserve agency in rural areas to help overcome food insecurity in times of scarcity and a disaster.

The existence of barns in the community on the wane because of government intervention to increase the role of Bulog. But Bulog is responsible for determining the price policy and the fulfillment of the national requirements have not been able to deal with food problems in Indonesia (Indonesian Ministry of Agriculture, 2010). Idea to regrow barn as food security agency that has been managed by villagers to be very important

Agricultural land in the village Muntuk is rain-fed so that during the dry season was planted corn, cassava and peanuts and is one of the villages that food insecurity has not been able to produce its own food reserves. Food Barn "Boga Lestari" in the village of Muntuk serves to maintain community food security by taking rice from outside the village Muntuk but still in the district of Bantul. Muntuk village is the village food insecurity has not been able to produce its own food reserves. Production of rice farmers just enough to meet the consumption needs of the family and even sometimes still deficient. Agricultural land in the village of rainfed Muntuk form so that during the dry season rice becomes dry and planted with corn

, cassava and peanuts . What role for sustainable food security barns in the village of Bantul Muntuk Dlingo? What are benefits for farmers with barns?

2. MATERIALS AND METHODS

2.1 Sampling Methods

The location determination is done by purposive research in Lestari Boga Food Barn in the Village Muntuk. c. Increase knowledge	2,35
Total score	7,57
Category :High	
Economic Benefit	
a. Easy to get food need	3,00
b. Utilize the barn at the time of food scarcity	2,53
c. Capital loan	2,24
d. Sales agricultural input	1,89
e. Sales of production to barn	2,40
f. Selling price	2,22
g. Purchase price	2,80
h. Interest rate loans	2,64
Total score	19,52
Category : High	
TOTAL SCORE	27,09
Category : High Benefit	

Barn role as a provider of food plays a role because most of the members utilizing the barn to feed during drought. Members utilizing the barns role as an economic institution to borrow capital.

Members borrow to the barn because its lending is lower than bank interest and do not require collateral to borrow money.

The selling price is the price given barns in selling goods in the barn. Agriculture input price offered in the barn by members equal to the market price so that many members who buy outside the barn because the price is the same and available at all times while in barn available only just before planting season

Benefits barns of various indicators can be categorized into the category of low benefit (score of 11 to 18.3) , the category of moderate benefit (score of 18.4 -25.6) and high benefit category (score of 25.7 to 33) . Table 5 shows that the benefits of the various indicators of the overall amount of the total score of 27.09. This shows the barns have high benefits for its members both social benefits and economic benefits .

CONCLUSSIONS

The number of the assessment scores barn role as the distribution of social grant funds, a provider of food and economic institution 27,09 The role of barns in the sustainability of food security can be categorized as high.

Assessment from member of benefits of the barns in the sale of agricultural inputs is still low because the sale of agricultural inputs are not available at any time. Benefits barns categorized is high , seen from the number of members assessment score that is equal to 27.27
