IV INTERNATIONAL CONGRESS OF ENGINEERING FACULTY OF MECHANICS (IV COINTI 2021)

The Higher Polytechnic School of Chimborazo, through the Faculty of Mechanics, organized and presented the IV INTERNATIONAL CONGRESS OF ENGINEERING - FACULTY OF MECHANICS ESPOCH 2021 under the theme: “The University, starting point of the industrial and economic development of the country” from 06 to December 9, 2021. The fundamental purpose of the congress was to facilitate the dissemination of knowledge and internationalization of science, while providing a space that promotes and supports the generation of new initiatives, the development of creativity and learning to face problems in the country and offering new development alternatives to the field of engineering.

This event created a space for the academic, scientific, and productive community to present research, innovations, technological developments, among others, through presentations, scientific articles, and keynote speeches. Overall, 10 international keynote speakers and 12 national lecturers presented their research findings and outcomes and 300 students as assistants were able to learn about the advances being developed in the areas of engineering with focus on the development of new technologies, design, and management of the production and manufacturing, polluting emissions from industry, business training and entrepreneurship, integrated management systems, metallic and non-metallic materials.

The attendees valued the high scientific quality of the research and speakers, as well as the massive attendance at the event highlighting the academic relevance and committing to attendance in the following year of another edition of the congress.
