# EDITORIAL

The quality of an institution's academic results is a vital feature of the modern university evaluation system. Strong results not only reflect high-quality teaching but also help to support the development of well-educated labor forces and sustainable knowledge economies.

This is a special conference issue of ESPOCH Congresses: The Ecuadorian Journal of S.T.E.A.M., containing a collection of papers from the X International Congress of Science, Technology, Entrepreneurship, and Innovation (SECTEI 2022), which showcase the groundbreaking work produced by the researchers at Escuela Superior Politécnica de Chimborazo (ESPOCH). This special issue focuses on economic developments within the South American region and considers them against the backdrop of Ecuador's national and international economic identity.
