Escuela Superior Politécnica de Chimborazo – Morona Santiago campus has the honour to submit the Memoirs of “III INTERNATIONAL CONGRESS OF SCIENCE AND TECHNOLOGY MORONA SANTIAGO CITMS 2023”, which defines the institutional research areas, as it represents a collection of scientific papers of the annual conferences, and it represents a platform where professors, researchers, national and international scientists, evince their experience results, as well as their research projects. This editorial work aims to provide an open forum whose business and interested people are able to follow, present and share the acquired knowledges about academics, science, healthcare, education and technology, which enhance not only the scientific expertise, but also propose feasible and possible solutions as regards to the main problems we had to deal with. We are infinitely grateful to all researchers who took part of the process, for their effort and dedication and those who achieved and managed to capture in the Memoirs the research acquired knowledges and experience.
